

## **HELIX ENERGY SOLUTIONS GROUP, INC. ENVIRONMENTAL & ENERGY STATEMENT OF POLICY**

Helix Energy Solutions Group, Inc. ("Helix") is committed to protecting the environments in which we operate while maintaining efficient operations. Applying our management systems, we aim to protect our environment, reduce our impact on the surrounding environments, reduce our energy consumption where possible, meet our clients' needs and deliver shareholder value.

Helix management systems actively encourage critical behaviors to actively work to eliminate environmental disturbances to the areas surrounding our operations. Where possible we also try to recycle a high percentage of waste from our operations.

Helix recognizes both the risks and opportunities in focusing on the environmental impacts of our operations. We believe reducing these impacts is best achieved by:

- Maintaining certification to ISO:14000 and to the extent not certified, striving to align our operational procedures with ISO:14001
- Using renewable energy sources for our facilities where possible
- Upgrading our equipment to low energy alternatives where possible
- Using suppliers who focus on energy efficiency and waste reduction / recycling
- Using local vendors where possible to reduce emissions from logistics
- Setting climate change targets (published as of November 2021) to reduce our emissions and waste, including:
  - Reduce Scope 1 CO<sub>2</sub>e emissions Per Day Under Charter for owned and chartered assets 10% below the 2019 baseline year by 2024
  - Reduce Scope 2 CO<sub>2</sub>e emissions 10% below the 2019 baseline year by 2024
- When planning our operations, including transit routes, giving consideration to the surrounding biodiversity to minimize our impact
- Crewing our vessels with local crew where possible to reduce emissions from travel
- Raising environmental sustainability awareness to all employees, contractors and interested stakeholders

Helix business plans include measurable environmental sustainability targets as goals for year-over-year improvement. We expect everyone who performs work for Helix, including vendors and contractors, to be committed to the tenets of sustainability and the responsible reduction of emissions set forth in this Statement of Policy. For additional information on our environmental and energy program, including our climate change targets, please see our current [Corporate Sustainability Report](#).
